Inaugural Bazy Tankersley Southwest Laureate Lecture

The Southwest North American Region – A Political Ecology of Cultures and Hegemonies

The Southwest North American Region is an intricate weave of peoples, places, and cultures. Trade and the struggle for control of the region's economy, lands and waters have profoundly marked its historical geography from the Prehispanic period into the present. In this lecture, Dr. Vélez-Ibáñez will offer an in-depth analysis of these processes, drawing on the insights of his nearly 50-year career in cultural anthropology and as a native of the México-US Borderlands.
